

GOLDSAINTE AI

Platform Overview for Developers

The Operating System for Travel Planning & Booking

Confidential — March 2026

Executive Summary

Goldsainte AI is not simply a travel marketplace. It is designed to become the operating system for travel planning and booking — a unified platform that connects inspiration, planning, collaboration, and booking into a single workflow.

The Problem: Travel Is Fragmented

Today, travelers move across multiple disconnected platforms throughout the travel lifecycle:

- Inspiration comes from TikTok, Instagram, Pinterest, and YouTube
- Research happens through Google, AI assistants, and travel blogs
- Planning occurs in Notes, Google Docs, spreadsheets, or saved links
- Booking is completed separately across airline sites, Expedia, Airbnb, or local operators
- Coordination happens through text messages, WhatsApp, email, or group chats

No company currently owns the entire journey from inspiration to confirmed travel. Goldsainte's opportunity is to unify this process.

The Three-Sided Marketplace

Goldsainte connects three interconnected networks:

Network	Who They Are	What They Do
Traveler Network	Users planning and organizing trips	Post dream trips, browse storyboards, compare proposals, book through escrow
Creator Network	Travel creators who curate destinations	Curate public storyboards, monetize audiences, link content to bookable trips
Agent Network	Travel professionals (advisors)	Browse trip requests, submit proposals, build itineraries, fulfill bookings
Brands / Experiences	Hotels, tour operators, experience providers	List services on the marketplace, get matched to relevant trips, sponsor storyboards

1. The Traveler Perspective

Travelers are at the center of the Goldsainte ecosystem. The platform replaces fragmented planning workflows with a single, unified experience.

What Travelers Do on Goldsainte

- Post a “dream trip” request describing destination, travel style, timing, and vision
- Browse and discover curated storyboards created by travel creators and agents
- Receive competing proposals from qualified travel advisors
- Compare proposals side-by-side and select the best option
- Book and pay through a secure escrow system
- Collaborate with travel companions on shared trip plans
- Duplicate and customize any public storyboard to fit their preferences

Key Flows

- Dream Trip Request → Receive Proposals → Select Agent → Escrow Payment → Travel
- Discover Storyboard → Duplicate → Customize → Request Quotes → Book
- AI Concierge Conversation → Generated Itinerary → Matched Agents → Proposal

2. The Content Creator Perspective

Travel creators are the growth engine of Goldsainte. They bring audiences, inspire travel, and monetize their influence through the platform.

What Creators Do on Goldsainte

- Build public storyboards showcasing destinations, itineraries, hotels, and experiences
- Share storyboard links across TikTok, Instagram, YouTube, and blogs
- Earn commissions when followers book through their storyboards
- Partner with travel agents to offer fully-bookable trip packages
- Maintain a creator profile page with all curated trips and content
- Create affiliate links for hotels, experiences, and travel products

The Growth Flywheel

- Creator posts travel content on social media
- Followers click through to the Goldsainte storyboard
- Followers explore, personalize, and request proposals
- Bookings generate commissions for the creator
- Creator reinvests in more content → cycle repeats

Why Creators Join

Creators are constantly asked “How can I do the exact same trip?” Goldsainte gives them a clear, monetizable answer: share a storyboard link where followers can plan and book the trip.

3. The Travel Advisor Perspective

Travel advisors (agents) are the fulfillment layer of the platform. They turn traveler dreams into bookable reality.

What Advisors Do on Goldsainte

- Browse open trip requests posted by travelers
- Submit detailed proposals with pricing, itinerary, and estimated timelines
- Build structured itineraries using the storyboard builder tools
- Manage client communications through the platform messaging system
- Track payments, milestones, and booking status through a CRM workspace
- Build a verified public profile with ratings, specialties, and completed trips

Key Flows

- Review Dream Trip Request → Submit Bid/Proposal → Traveler Accepts → Build Itinerary → Escrow Release
- AI Match Notification → Review Lead → Contact Traveler → Close Booking
- Create Package → Partner with Creator → Creator Promotes → Bookings Flow In

Verification & Trust

Agents go through a verification process including identity checks, licensing validation, and insurance verification before they can submit proposals.

4. The Brands & Experiences Perspective

Hotels, tour operators, experience providers, and travel service companies list their offerings on the Goldsainte marketplace.

What Brands Do on Goldsainte

- List hotels, tours, experiences, and travel services on the marketplace
- Get matched to relevant trip requests and storyboards by the AI layer
- Sponsor creator storyboards to reach targeted travel audiences
- Offer exclusive packages or deals through the platform
- Receive qualified leads from travelers actively planning trips

Key Flows

- List Experience → AI Matches to Relevant Trips → Traveler Discovers → Booking
- Sponsor Creator Storyboard → Creator Promotes → Followers Book Experience
- Respond to Group Trip Requests → Custom Package Proposal → Booking

Value Proposition

Unlike traditional advertising, Goldsainte delivers brands to travelers at the moment of planning — when purchase intent is highest. The AI matching layer ensures relevant surfacing rather than generic ads.

5. The Travel Storyboard

The storyboard is the core object of the entire platform. It is not simply another feature — it is the object around which the platform is designed.

What Is a Storyboard?

A storyboard is a structured travel plan that may include:

- Destinations and route mapping
- Hotels, restaurants, and accommodations
- Experiences, activities, and tours
- Creator content: images, videos, and editorial notes
- Day-by-day itinerary structure
- Pricing breakdowns and booking links

Conceptual Analogy

Think of it as:

- A Pinterest board — for travel inspiration and curation
- A Figma file — for collaborative trip design
- A Notion page — for structured itinerary organization

Key Capabilities

- Public & Shareable: Each storyboard has its own URL and can be shared anywhere
- Duplicable: Any traveler can clone a storyboard and customize it
- Collaborative: Multiple travelers can edit and plan together
- Bookable: Storyboard items can be linked to real bookable products
- AI-Enhanced: The AI layer can generate or optimize storyboard content

6. Platform Architecture Summary

AI Orchestration Layer

Agentic AI serves as the orchestration layer that powers the platform:

- Generates trip concepts from inspiration sources
- Personalizes itineraries based on traveler preferences and history
- Matches travelers with appropriate travel advisors
- Assists advisors in building optimized proposals
- Supports travelers throughout the planning process via AI Concierge

Tech Stack

- Frontend: React 18, TypeScript, Vite, Tailwind CSS, shadcn/ui
- Backend: Lovable Cloud (PostgreSQL, Auth, Edge Functions, Realtime, Storage)
- Payments: Stripe Connect with escrow milestone system
- Maps: Google Maps / Mapbox GL
- AI: GPT-4o for concierge, itinerary generation, and agent matching

Marketplace Dynamics

The traveler-driven request marketplace creates competitive dynamics:

- Travelers post requests → Agents bid with proposals → Best proposal wins
- This ensures travelers receive curated, personalized options
- Agents compete on quality, not just price

7. Strategic Vision

Not a Booking Site — An Infrastructure Layer

Goldsainte follows the same strategic approach as Airbnb, Shopify, and Apple: control the infrastructure layer rather than simply hosting listings.

When planning takes place inside Goldsainte:

- It naturally becomes where bookings occur
- Where suppliers are surfaced
- Where travel agents respond to requests
- Where creators monetize the travel experiences they share

The Long-Term Vision

Goldsainte becomes the place where travel begins. Travelers plan trips there, creators share experiences there, travel agents fulfill requests there, and AI supports the entire journey.

Global travel spending exceeds \$9 trillion annually. By positioning as the planning layer, Goldsainte sits at the top of the travel funnel — where inspiration converts into actual bookings.

Core Strategic Insight

The company that controls the planning layer controls the booking layer. Goldsainte is building that planning layer.
